KÄHRS LIFE

Kährs Life is a durable timber floor constructed to withstand the rigors of real life.

This brochure includes a curated collection of Kährs Life colours and formats available from Belgotex New Zealand.

(see more on page 9)

A NEW TYPE OF WOODEN FLOOR

We have been working with wood for more than 160 years, driven by a passion to turn the natural beauty of wood into beautiful and sustainable floors. The result has been a world-leading manufacturing position in wood flooring. Seeing a need for a wooden floor with even more durable properties, we applied all our knowledge and expert craftsmanship to create a new type of wooden floor. Now, we are proud to introduce Kährs Life. A real wooden floor. Made to last, every day.

A GROWING RESOURCE

A sustainable forest supply is important, today and for future generations. In Sweden, where we source most of our raw material for our wood flooring, more than 70% of the landscape is covered by forest. Thanks to more trees being planted than harvested, these forest assets have doubled in the last 100 years.

WOOD

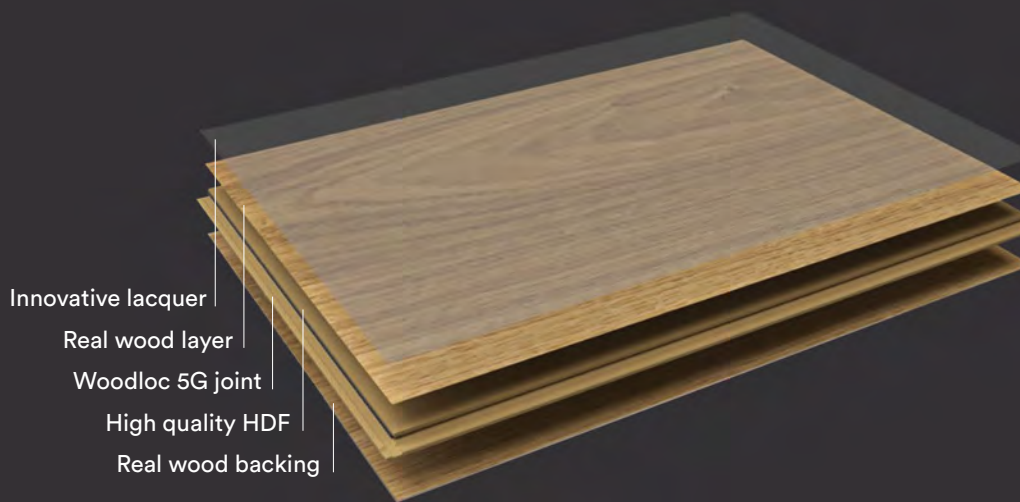

Wood floors keep your feet warm on cold days and comfortably cool on warm days, thanks to their natural structure. Wood was designed by nature to be a great insulator with thousands of air chambers per cubic inch. In fact, wood offers seven times better insulation than ceramic tiles and is much warmer than plastic laminate.

THE POWER OF WOOD

Wood has the power to create warmth and atmosphere like no other flooring material. It can soften a minimalistic interior and add richness to a classic interior design. A light floor reflects the light and creates a feeling of openness, while a darker floor can make the space feel warm and cosy.

MATT LACQUER

The innovative lacquer system makes Kährs Life resistant to wear and tear. The lacquer system is dirt-resistant and provides a surface that is easy to clean since the dirt is not able to penetrate the lacquer.

5G JOINT

Kährs Life comes with a 5G joint which makes installation fast and easy. On the short side of the board, the 5G locking systems enable simple and fast installation, without the need for any tools. On the long side, the boards are locked in the traditional angling way.

HDF

Kährs Life has the next generation of high-quality HDF core, providing a stable floor, lasting through variations in humidity and temperature, with good dent and impact resistance.

IMPROVED HYDRO-RESISTANCE

The innovative lacquer system on Kährs Life delays the penetration of water through the pores and grains of the wood, giving you plenty of time to wipe up any spills.

PERFECT FOR RENOVATION

Are you looking to renovate? Kährs Life normally fits with existing doors and thresholds, making your life easier. Floating or glued down, that's up to you, either installation method is possible.

UNDERFLOOR HEATING

Kährs Life is suited to be installed on top of underfloor heating, as long as the installation requirements are fulfilled. The high-quality HDF core makes Kährs Life stable to variations in temperatures and humidity.

35 YEAR RESIDENTIAL WARRANTY

Kährs Life comes with a comprehensive 35 year residential warranty. Download care and maintenance instructions at belgotex.co.nz

Pure Oak	Faded Black

Wide **(W)**

1810 × 150 × 7mm

Cocoa Bean	Whole Grain
Earl Grey	Driftwood
Light Suede	Butterscotch
Pure Oak	Faded Black

CLEANING AND MAINTENANCE

As with many other products, a certain amount of maintenance is required to keep a floor in good condition. With proper maintenance, your European Hardened Timber floor will retain its beauty for years to come. Light floors, are typically more sensitive to wear-and-tear than dark ones, and therefore require more frequent cleaning and maintenance. Our wood floors are durable and easy to keep clean, but there are some things you need to think about.

KEEP GRAVEL AND SAND OUTSIDE

The first thing you can do for your wood floor is get a good doormat to clean and dry shoes before coming in. Ideally both in and outside the door.

PUT PROTECTIVE PADS ON FURNITURE

Put soft pads on the bottom of table and chair legs and keep an eye that they haven't fallen off. Don't use protectors made of metal as they can wear patches and scratch the floor.

LIGHT FLOORS NEED MORE ATTENTION

If you have light wood floors, you'll need to clean them a little more often because they are more prone to wear.

CLEANING HARDWOOD FLOORS

Dry cleaning is the best way to clean hardwood floors, rather than wet cleaning. Vacuum and dry brush regularly and occasionally use a Bona microfibre spray mop.

For best results, use a Bona pH neutral cleaner, following cleaner instructions. The floor should dry within a minute if you've used the right amount of cleaner.
