Belgotex®

COPENHAGEN | Pearl

KATHMANDU | Shadow

The **Premium Wool** range of products showcases the unique and charming characteristics inherent to wool and natural blended materials. These variations in colour and consistency add to the authentic and natural allure of the product.

Unlike the uniformity of synthetics, these features celebrate the distinctive, organic appeal of wool, enhancing its timeless elegance.

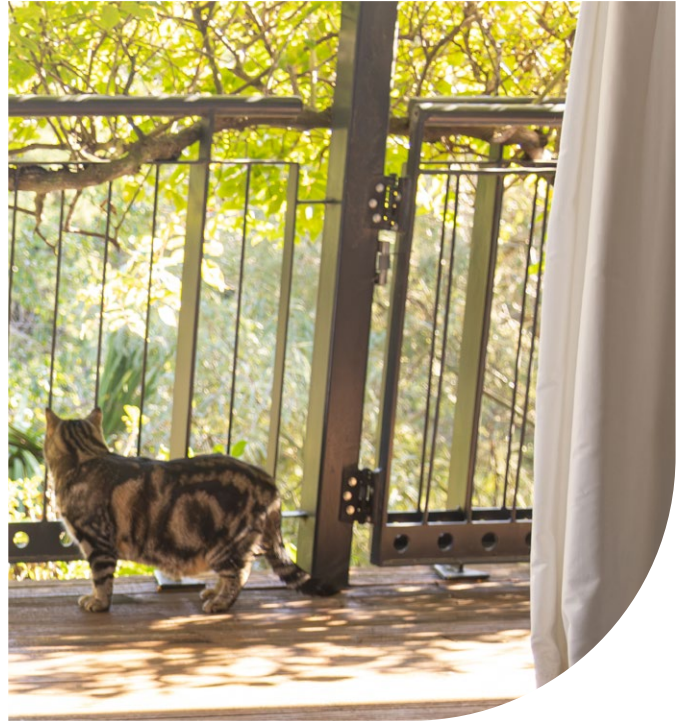

Timeless appeal

Belgotex Premium Wool ranges **Lhasa** and **Kathmandu** feature Yak fibre, which has been seamlessly intertwined with pure wool, resulting in a distinct colour palette with truly elegant textures.

LHASA | Shade

Embrace the natural benefits of wool

We all know wool to be a miracle fibre. Warm to the touch in winter, cool to the touch in summer. A fibre that when you use it in flooring will help to regulate the temperature in your home as a natural insulator.

Not only that, but add to the list of natural benefits a safer (naturally fire retardant), hypoallergenic product that also comes from a fully renewable resource – how could you go wrong?

*Belgotex are dedicated to the care and maintenance of our products. Visit belgotex.co.nz for full cleaning and maintenance guidelines.
